- Venue: IPH gGmbH, Hollerithallee 6, 30419 Hannover, Germany
- Participation fee: 650 euros per person
- Deadline 22 January 2018

20. 2017

IPH/GREAN | A clever energy management saves companies a lot of money. The practice-oriented workshop on "Energy management in production", taking place on 20 February 2018 in Hannover, gives you the right tools. Registration deadline is 22 January 2018.

With smart energy management solutions, companies can cut production costs down and simultaneously protect the environment. The seminar on energy management in production teaches executives and energy managers of production industry how that works.

The workshop provides the fundamentals of systematic energy management in accordance with the international standard ISO 50001. Participants learn how to detect stealthy energy hogs and identify energy-saving potentials, and what they can do immediately to reduce their energy consumption. Moreover, the workshop provides useful practical experience: Thorsten Fischer of HARTING Electric GmbH & Co. KG will report on the successful implementation of an energy management system in his company.

The workshop held in German language is a joint event of GREAN GmbH and the Institut für Integrierte Produktion Hannover (IPH) gGmbH. For more information and registration details please refer to www.praxisseminar-energiemanagement.de/en/.
