

Basics of factory planning in two days

Auf einen Blick

- Practical seminar "Factory Planning" on 10 and 11 October 2017
- Target group: specialists and executive managers
- Basics of factory planning

20. 2017

IFA/IPH | In October, professionals and managerial staff will have the opportunity to learn the basics of how to build a new factory or how to expand or reorganise their existing one. In the practical seminar "Factory Planning", experts will impart comprehensive knowledge which can be applied by the workshop participants immediately.

Whether reorganising or expanding an existing production plant or building a new factory on the green fields – factory planning is not an everyday task for most of the companies. For this reason, the Institute of Production Systems and Logistics (IFA) of Leibniz Universität Hannover and the Institut für Integrierte Produktion Hannover gGmbH (IPH) will offer the two-day practical seminar "Factory Planning".

Apart from learning the mere fundamentals, case scenarios presented throughout the whole seminar will give specialists and executive managers the opportunity to put their newly acquired knowledge into practice. Experienced factory planners will present real-life project examples and answer the participants' questions.

The seminar will be held on 10 and 11 October 2017 from 9 a.m. to 18 p.m. The venue will be the Hannover Centre for Production Technology (PZH), An der Universität 2, 30823 Garbsen, Germany. The attendance fee of 1,050 euros per participant includes board and seminar documents.
